DX-1G Basic User Setup

Fully charge and insert Li-Ion battery (included with camera), insert 4GB or smaller SD or SDHC memory card.

Please note that the following setup options are recommended for underwater camera use. Land shooting may require user to change some settings.

Please consult user manual for additional camera features and specifications.

Turn camera power on, press Menu button and toggle right to SETUP.

***Macro setting shuts off when Review mode is used (not quick review). Remember to push the macro button after going into review mode

Additional Recommendations:

Batteries:
1. Rechargeable Li-Ion Ricoh DB-60 battery is included, additional batteries are available from SEA&SEA Retailers (Part #DX-1G BATTERY)
2. Rechargeable AA Ni-MH batteries 2300 mAH or higher recommended for external strobe.

Memory Card:
1. 4GB or smaller Secure Digital (SD) or SDHC card from major manufacturer such as SanDisk, Lexmark or others.

Please consult http://www.seaandsea.jp/dx1g/index.html for additional setup and product information.
