

SEA&SEA Announces MDX-EM5 MK II Housing

SEA&SEA announces the upcoming release of the newest addition to SEA&SEA's mirrorless class family: the **MDX-EM5 MK II Underwater Housing** for the Olympus OM-D E-M5 Mark II Mirrorless Digital Camera.

To manage the essential controls of the Olympus OM-D EM5 Mark II, this precision engineered housing has SEA&SEA Housing's fundamental features including ergonomically re-designed levers, a corrosion-resistant aluminum alloy body, and a movable focus and zoom gear.

The Olympus OM-D E-M5 Mark II Mirrorless Digital Camera has significantly improved features for underwater photographers including an upgraded electronic viewfinder, which now has a 2.36 million dot LCD panel. For videographers, Olympus now offers focus peaking and an upgraded frame rate (60 fps) and bitrate (77 Mbps) with both ALL-I and IBP recording modes.
